

ADVENTURES  
*in good company*

## SLACKPACKING GEORGIA

### PACKING LIST

#### FOOTWEAR

- \_\_ 1 pair of midweight hiking boots or shoes
- \_\_ 1 pair of alternate trail running shoes (In case you get blisters from your main hiking shoes. Can be helpful to have a size slightly larger than your hiking shoes)
- \_\_ 1 pair comfortable shoes for after hiking and general use (Ex: Crocs/Sandals)
- \_\_ (Optional) 2 pair thin liner socks: silk or synthetic equivalent (If you plan on hiking in liner socks on the trip, please train with them too)
- \_\_ 2-3 pair hiking socks: wool or synthetic equivalent (Coolmax, Thorlo, Smartwool, etc)

#### CLOTHING

- \_\_ 1-2 pair comfortable, lightweight, synthetic hiking pants
- \_\_ 1 pair shorts (optional with zip-off nylon pants)
- \_\_ 1 long-sleeved, lightweight shirt for protection from sun
- \_\_ 3-4 synthetic t-shirts or short-sleeved shirts
- \_\_ 1 lightweight long underwear top: silk, wool or synthetic equivalent (Capilene, Thermastat, or polypropylene)\* (Fall trip only)
- \_\_ 1 medium-weight top layer (wool or fleece shirt or vest)\*
- \_\_ 1 fleece or lightweight jacket
- \_\_ 1 ball cap for protection from the sun
- \_\_ 1 lightweight wool or fleece hat\* (Fall trip only)
- \_\_ 1 lightweight pair wool or fleece gloves\* (Fall trip only)
- \_\_ 1 rain jacket and rain pants/rain skirt: should be a **waterproof**/breathable fabric like Gore-tex
- \_\_ Underwear (bring a few pairs of moisture wicking, not cotton, for hiking)
- \_\_ Nightwear/Pajamas
- \_\_ 1-2 changes of comfortable clothes to wear around the house and out to dinner (e.g. pants and/or skirt, with a couple of tops)
- \_\_ *Swimsuit (the house has a pool)!*

#### EQUIPMENT/ESSENTIALS

- \_\_ 1 pair trekking poles (required)
- \_\_ 1 daypack (24-40 Liter)
- \_\_ Capability to 'waterproof' your backpack (rain cover or a heavy-duty contractor bag to line your pack)
- \_\_ Small headlamp or flashlight
- \_\_ 2-liter water capacity
- \_\_ Sunglasses (100% UV blocking) with retention strap
- \_\_ 1-2 bandannas
- \_\_ Sunscreen & lip block with SPF of at least 30

ADVENTURES  
*in good company*

- Ear plugs (for a good night's sleep!)
- Extra snacks (snacks will also be provided)
- Plastic, tupperware type container for lunch/sandwich
- Spork (for trail lunches)
  
- FALL TRIP ONLY** A 'blaze orange' item such as a piece of clothing, hat, bandana, vest\* – 'Blaze Orange' ■ is required for hikers on the Georgia section of the AT during the hunting season. These are available online or at a sporting goods store.

### TOILETRIES (small everything)

- Toothbrush, toothpaste, dental floss, hand sanitizer, shampoo, contact lens paraphernalia, sanitary supplies
- Personal first aid/patch kit - Band-Aids, 1 safety pin, moleskin, Compeed (or blister bandages), ibuprofen, any personal medications

**Please note: Individuals who have had or have the potential for a severe allergic reaction to insect stings, specific foods or medications must bring an epi-pen.**

Please consult your physician and tell your guide.

### OPTIONAL

- |  |   |
|--|---|
| <input type="checkbox"/> camera and film/memory card (extra batteries) | <input type="checkbox"/> pocketknife            |
| <input type="checkbox"/> cell phone, charger                           | <input type="checkbox"/> short ankle gaiters    |
| <input type="checkbox"/> wristwatch/travel alarm clock                 | <input type="checkbox"/> compact binoculars     |
| <input type="checkbox"/> journal and pen                               | <input type="checkbox"/> lightweight umbrella   |
| <input type="checkbox"/> tecnu poison ivy & oak scrub                  | <input type="checkbox"/> permethrin (for ticks) |
| <input type="checkbox"/> spork   |   |

## NOTES ON PACKING

Adventures in Good Company's packing list includes items to help you be prepared for the various activities and conditions. It is not personalized, so please add the items that you require to travel safely and comfortably. You may not use everything you bring; however, you need to come prepared for all possible weather. At the same time, you must be able to carry your own luggage, sometimes up and downstairs. Bringing a duffel bag or soft-sided suitcase with wheels, rather than a hard-sided suitcase, is easier for packing into the vans that will be transporting our luggage. **As space for luggage on our trips is limited, please do not overpack!**

**Daypacks:** Your daypack should be large enough to hold the following items: 2-3 liters of water, rain gear, lunch/snacks (for the day), sunscreen, warm layer (fleece pullover or vest), personal first aid kit, lightweight gloves, warm hat and personal items such as camera, etc. We recommend a daypack with a capacity of between 24–40 Liters with a hip belt, padded shoulder straps, and 'lifters'. Line your daypack with a durable plastic bag to keep your belongings dry, and/or have an elasticized pack cover that fits snugly over it. Before you leave home check to be sure that it is

**ADVENTURES**  
*in good company*

comfortable to wear all day and has sufficient space for all of your items.

**IMPORTANT: Before you leave home check to be sure that it is comfortable to wear all day and has sufficient space for all of your items.** Note: Fanny-packs and hydration packs are not large enough to hold all of the items you will need for the day.

**Footwear:** Well-fitting, sturdy boots or trail shoes are very important to your safety and enjoyment. If you plan to buy new shoes or boots, break them in by wearing them around town and taking some short hikes *before* your trip. Also, try out what sock/shoe combo works best for you to avoid blisters. For general hiking, lightweight or midweight cordura or leather boots with a Vibram sole work well. If you have weak ankles or are recovering from an ankle injury, get boots that come above the ankle – you'll find that this will give you more support in uneven or slippery terrain.

**Clothing:** The clothing listed on the packing list has been chosen for your specific trip conditions and for its versatility for layering. NO COTTON for your activewear! It should all be made from synthetic/synthetic blends, down/down blends or wool/wool blends. Layering is the most practical and efficient method of insulating the body. Several layers of varied weight materials provide better insulation than one thick Layer of clothing. Also, adding or subtracting layers allows you to adjust to the temperature at your particular level of activity. **Note:** poison ivy and ticks common along the trail in Georgia. Consider wearing pants and sending your clothes to insect shield to be treated with permethrin. This process can take a few weeks so plan ahead.

### **Poison Ivy:**

**Rain Gear:** You will need a parka or jacket made of a coated nylon or a waterproof/breathable fabric like Gore-Tex, HellyTech, Membrane, H2No, or Ultrex.

**Be sure it keeps water out.** Before making this important purchase, be sure that it fits you properly. It should be large enough to fit over all your layers. In particular, the hood needs to be effective. It should shield your face from the rain and turn with your head. Movement of your arms must not interfere with the

**ADVENTURES**  
*in good company*

hood. Put on your daypack; can you still raise your arms? Your wind/rain pants should be comfortable, allow enough room for your layers, and permit free movement of your legs (for example, can you crouch comfortably?). Partial or full-length leg zippers are useful for easily putting your pants on over your boots. An inexpensive plastic poncho will both leak and tear easily and is not recommended.

**Hydration:** Being able to easily access your water without assistance, so that you can drink frequently, is important to your safety and enjoyment. One method is to have a water bottle attached to your waist strap. Another option is to use a **HYDRATION SYSTEM** such as CamelBak, Platypus, and MSR bladder bags, which are collapsible water bags with a hose attachment that you drink from. The bags fit inside or outside your pack with the hose positioned over your shoulder so that you can access your water as you hike. Bladder bags can hold 2 - 3 liters of water.

**Personal First Aid Kit:** Bring a small first aid kit with familiar medicine and first aid supplies you might need. Previous participants have encountered many blisters on this trip! Be sure to bring plenty of the following: blister or foot remedies like moleskin, silicone toe protectors, Compeed, blister bandages, or similar, a small roll of duct tape (can wrap it a few times around your trekking poles), remedies for respiratory ailments, stomach ailments, sore muscles or joints. The guides will have a first aid kit but having what you know works well for you is a good idea.

**Trekking Poles:** Trekking poles are required for this trip. Trekking poles contribute to your safety by improving your balance and stability, and to your health by saving stress on your hips and knees. If you are not familiar with trekking poles, [click here to read this blog post](#) that addresses the most commonly asked questions. Trekking poles are usually collapsible and should be collapsed to fit into luggage.
